

Cross Hose & Fitting Hose Safety Awareness Week 2024

Cross Hose & Fittings will be continuing our social media series “Henry at the Hose Store” with a special six part second series focused on all the things our hose associates do in order to keep themselves and their customers safe. From cleaning hoses to using the same brand of hose and fittings to wearing the correct PPE, Henry will demonstrate how Cross associates embody our safety cultural cornerstone every day. He speaks to several different members of our Raleigh hose team in the series, demonstrating key aspects of our safety precautions and finishes with a wrap up of why safety is so important to Cross.
