

THE ASSOCIATION FOR HOSE AND ACCESSORIES DISTRIBUTION

charity: water works in 29 countries worldwide focusing on providing rural communities with their first access to clean water. Over the past 15 years, the organization has implemented over 94,000 water projects to provide safe, clean water for more than 14 million people. Fully 100 percent of NAHAD's donations go directly to water project costs (private donors cover salaries and overhead).

Every drop matters.

In 2016, NAHAD embraced clean water as its social cause, harnessing the talents and resources of the association and its members to make positive impacts across the globe.

After careful review and analysis, NAHAD selected **charity: water** as its partner in this initiative.

Through donations on dues renewal forms and awareness campaigns tied to our annual conventions, we have raised over \$33,000 in support of our social cause. This money has provided more than 1,000 people access to clean water and bring us closer to ending the global water crisis. All contributions —100 percent — are sent to the field, where it changes lives and brings water security to the world's most vulnerable populations.

771 million people in the world live without clean water.

NAHAD Gives Back in 2022

For 2022, NAHAD will support a Clean Water Project, an individual project with a support level starting at \$10,000. NAHAD is aiming higher, with a goal to raise \$20,000 this year.

Our social cause, charity:water, will determine the best location for the project. Once completed, charity: water will post GPS coordinates, photos, and a project description on Google Maps. It takes 21 months of planning and community training to make a water project successful. During that time, charity:water provides updates and will send NAHAD a completion report when the project is complete.

How to Give

MyCharityWater is an online fundraising element of the campaign where NAHAD has created an online campaign with a \$20,000 project goal. Individual member companies, employees, and supporters can contribute directly to the project online, complete with campaign updates, project visuals, and location information.

What Will NAHAD's Water Project Sponsorship Cover?

Fully 100 percent of NAHAD's donation goes to water project costs "on the ground." (Private donors cover the salaries and overhead and breakdown costs can vary by country, partner, and technology.) The sponsorship covers:

- 50% for materials: cement, pipes, pumps, construction supplies, training materials, etc.
- 20% for local staff costs: drillers, welders, well technicians, and hydrogeologists
- 20% for in-country program support: accountants, drivers, computers, internet, etc.
- 10% for mobilization: fuel, vehicles, and lodging for drill crews in remote areas
